Date: Monday, April 25, 2016 3:38:12 PM

Hi Raji – in this email below from Adam I assumed that when he mentioned personal from the office there to see the site, that would probably be you and Stephen visiting the site prior to the community meeting. I was also going to be at the site in the afternoon, and possibly Eric as well.

What time do you think you will be there?

Thanks

Matt

Thanks. Just a reminder that I tasked my START to check the site on that day after lunch. There will also be two additional personnel from the office there to see the site. I asked Corey and/or Derrick to coordinate with your team.

Thanks Eric.

Adam

Hi Adam –

I had one addition to the list below. We are now confirmed to remove four additional loads from the Site on Thursday (April 28) from USOR and MCC sites.

Please let me know if you have any questions.

Thanks.

Eric

Subject: USOR - Site Activities Next Week

Hi Adam –

I wanted to let you know about Site activities being performed next week:

- Monday – pumpdowns (approximately 4 loads anticipated) at the USOR and MCC sites, including from the frac tank temporarily staged on the MCC site this week;
- Monday/Tuesday – inventory/labelling of washed roll-offs in anticipation of transfer to temporary off-site storage location. As we previously discussed, I will provide more details, including the schedule, for the actual transfer once we have a signed lease for the off-site

location. I anticipate that is at least three weeks away;

- Wednesday – pre-removal reconnaissance of ASTs by Clean Harbors. Clean Harbors wants to visit the site and check the consistency of the solids in some of the ASTs in order to finalize their proposal for the solids removal. As you know the schedule for the solids removal is to be determined pending EPA approval of the AOC for that work.

We will also have folks on-site periodically during the week to prepare for the RI/FS field activities that start the following week. Preparatory activities will include meeting with pipeline representatives in response to our one-call request, clearing vegetation from areas to be sampled, etc.

Please let me know if you have any questions regarding this schedule.
